

March 2010

Caro cliente,

desidero personalmente ringraziarti per il tuo interesse a conoscere i nostri prodotti. Mi auguro che la nostra "yarn list" possa partecipare e contribuire attivamente alla realizzazione dei tuoi progetti.

Questa raccolta di filati non è solo un elenco di fibre più o meno nobili, percentuali, titoli, ma è una sintesi dell'impegno e dell'affetto che un gruppo di uomini, che ho l'onore di guidare e coordinare, hanno per il proprio lavoro e per questo settore. Ritengo che all'alba del XXI secolo, in piena "vecchia Europa Occidentale", tutti coloro che quotidianamente si impegnano in una qualsiasi attività tessile debbano essere rispettati prima di tutto per l'amore che hanno per il proprio lavoro.

Dear Customer,

I would like to thank you personally for the interest you showed in our products. I wish our yarn list could be a mean and a contribution to achieve your projects. The yarn collection is not only a list of more or less noble fibres, percentage and counts but a synthesis of a commitment of a group of people, whom I am proudly leading, have towards their own jobs and towards this specific field. At the beginning of XXI century, in the heart of "Old West Europe", I believe all people engaged in any kind of textile activity are deserving of the highest respect for the way they love their jobs.

TECHFIL S.R.L.
C.E.O.
A. Agostini

YARN LIST 112 N06

Il **TEAM Techfil** pone al centro della sua attività l'esaltazione delle doti umane e professionali di ognuno di noi dall'Amministratore Delegato ai vari assistenti, rendendoli tutti manager del proprio operato. Con la stessa attenzione Techfil si rivolge ai propri clienti, fornitori e alla capogruppo Fil Man Made confrontandosi con eventuali diversità di origini culturali e sociali.

*The activity of **Techfil's team** is centered on the enhancement of the human and professional qualities of each and everyone, from the Managing Director to the assistants, by making them managers of their conduct. Techfil has the same approach towards its customers, suppliers and Head company Fil Man Made, addressing any eventual difference from the cultural and social standpoint.*

TECHFIL

TECHFIL Trader, sin dalle origini, ha intrapreso e consolidato un percorso che si è sempre affidato alla costruzione di solidi rapporti con fornitori/partner, per un continuo e costante miglioramento qualitativo del prodotto importato.

La differenza del prodotto Techfil si basa su rigorosi test qualitativi per ogni singolo arrivo di filato.

TECHFIL Manufacturing è il distributore del gruppo Fil Man Made nel segmento fashion.

Progetta e realizza i prodotti di tendenza seguendo il trend delle stagioni e della necessità della clientela.

Le tecnologie di filatura utilizzate, ring e oe, ci permettono di offrire una gamma di prodotti che copre la totalità degli attuali end use del tessile abbigliamento.

La tecnologia ring è costituita dalle versioni convenzionali, siro e corespun in modo da realizzare prodotti elasticizzati, jaspè, mischie con fibre speciali, titoli estremi fino ad Ne 100.

TECHFIL Trader, since it's establishment, has undertook and consolidated an approach based on creating solid relationships with our suppliers/partners, in the framework of a continuous and constant improvement in the quality of imported products.

The difference of the Techfil product is based on strict qualitative tests for every single yarn supply.

TECHFIL Manufacturing we are the distributor of the Fil Man Made Group in the fashion segment.

We design and realize up-to-the-minute products following seasonal trends and our customers' requirements.

The spinning technologies employed, ring and oe, allow us to offer a range of products that covers all current end uses in the clothing textile field.

Ring technology is made up of conventional versions, siro and corespun, so that elasticized, jaspè, special fibre mix products and extreme counts up to Ne 100 are realized.

Master Collection Summer & Winter

by

Rappresenta la linea di filati esclusivi realizzati dal nostro gruppo ed è frutto di un lavoro di equipe in cui converge attività di marketing, presentazione stilistica, rigore ed attenzione tecnica per la realizzazione produttiva, la scelta e la valutazione delle materie prime.

Tutti questi filati sono costruiti con la logica di raggiungere limiti estremi in termini di filabilità, materie prime usate e tecnologie di filatura, rispettando con grande attenzione le tempistiche dei campionari e le relative stagionalità.

Il nostro staff tecnico e commerciale è a disposizione della clientela per perfezionare e personalizzare le nostre proposte, augurandoci di costruire sempre più strette collaborazioni condividendo progetti comuni.

This collection is the most exclusive selection of yarn made by our Group. It is an expression of a working team in which marketing activities, style presentation, technical care, exactness, perfectly blend for the ideal production realization, choice and evaluation of raw materials.

The aim of these yarns is to reach extreme limits in terms of spinnability, use of raw materials, spinning technologies following with care the samples schedule and the sales seasons.

Our sales and technical departments are at your disposal to improve and personalize our proposals, moreover we wish to build even better co-operations sharing common goals.

Brilliant Project

by

Geniale l'idea di realizzare filati Corespun con copertura 100% Lino, elasticizzati e rigidi, grazie a materie prime e tecnologie di filatura selezionate.

L'end use di questi prodotti, è mirato a tessuti ortogonali per camiceria uomo, abbigliamento esterno donna, capo spalla raffinati e casual di alta moda.

Le esclusive performance di questi prodotti consentono di realizzare tessuti stretch all'interno di collezioni tipicamente liniere, uniti e fantasia, oppure tessuti rigidi convenzionali di pesi leggeri con effetti di trasparenza.

Absolutely Brilliant the idea to produce Corespun yarns with 100% linen covering, elasticised and/or stiff, thanks to high quality raw materials and state-of-the-art spinning technologies.

The end use of these products is aimed to orthogonal weaving for mens' shirts, external womens' apparel, sophisticated outerwear and high fashion casual wear.

The performances of these products enable us to produce stretch fabrics in a framework of typically linen collections, even tint and pattern fabrics, or conventional light weight stiff fabrics with see-through features.

TARGET

Filati ad alta percentuale di fibra di Canapa in mischia con Cotone e Viscosa di Bamboo.
E' suggerito per impieghi in tessuti casual e di arredamento pregiato.
E' da menzionare l'elevata resistenza della Canapa.

High percentage of Hemp fibre yarns blended with Cotton and Bamboo Viscose.

Suggested in casual wear fabrics and luxury furniture.

To be noted the high Hemp resistance.
